

Module 4: Hands-On: Deploying a VM from a Custom Image

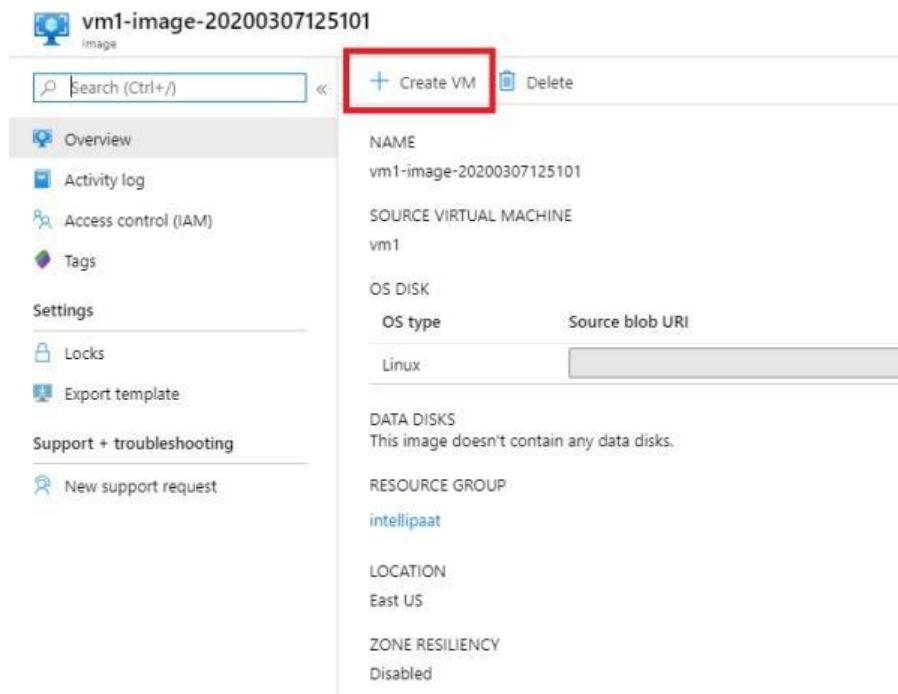

Step 1: Go to the virtual machine for which you want to create a VM. Click on Capture in the top menu bar

Step 2: Fill in the details as required and click on Create

Step 3: Once the deployment is complete, go to the resource and click on Create VM

Step 4: It will redirect you to a wizard for creating a virtual machine. Fill in the name and resource group as required. Then click on Review + create

Create a virtual machine

Create a virtual machine that runs Linux or Windows. Select an image from Azure marketplace or use your own customized image.
Complete the Basics tab then Review + create to provision a virtual machine with default parameters or review each tab for full customization.
Looking for classic VMs? [Create VM from Azure Marketplace](#)

Project details
Select the subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.
