

Module 7: Hands-On: Creating Azure Traffic Manager

Step 1: Open Azure Portal and search for Traffic Manager Profiles in the box, and then click on Create

Step 2: Enter the basic details such as name, subscription and resource group, and then click on Create

Home > Load balancing > Traffic Manager >

Create Traffic Manager profile

Name *

demo-trafficmanager

Routing method

Performance

Subscription *

Azure Pass - Sponsorship (4362042a-1e87-43ca-83aa-3c7ebc545a78)

Resource group *

Az-104
