

Module 1: Hands-On: Connecting to Azure Bash Shell

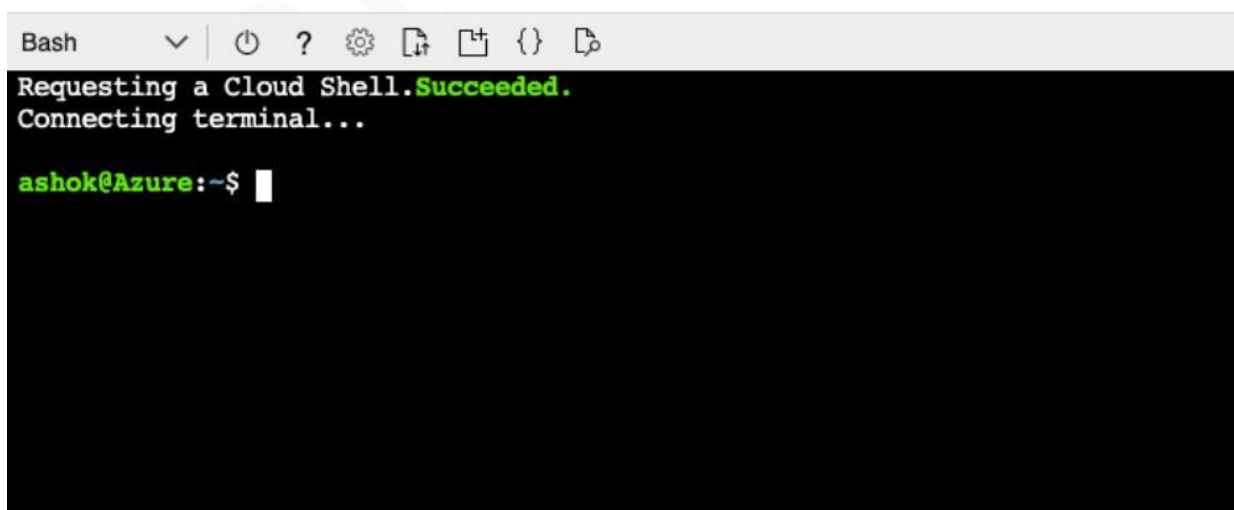

Step 1: Go to <http://portal.azure.com> and click on the cloud shell icon on the taskbar

Step 2: A 'Welcome to Azure Cloud Shell' message will pop up. Select Bash

Step 3: Once the terminal connection has succeeded, you can type in your commands

Step 4: Type the command 'az group create --location westus --name MyRG' to create a new resource group 'MyRG' in west US. Press Enter.

```
Bash
]
ashok@Azure:~$ az group create --location westus --name MyRG
{
  "id": "/subscriptions/ca919e20-8606-4efa-ab35-7f08ded4b58d/resourceGroups/MyRG",
  "location": "westus",
  "managedBy": null,
  "name": "MyRG",
  "properties": {
    "provisioningState": "Succeeded"
  },
  "tags": null,
  "type": "Microsoft.Resources/resourceGroups"
}
ashok@Azure:~$
```
