

Module 8: Hands-On: Creating a New Tenant in Azure Active Directory

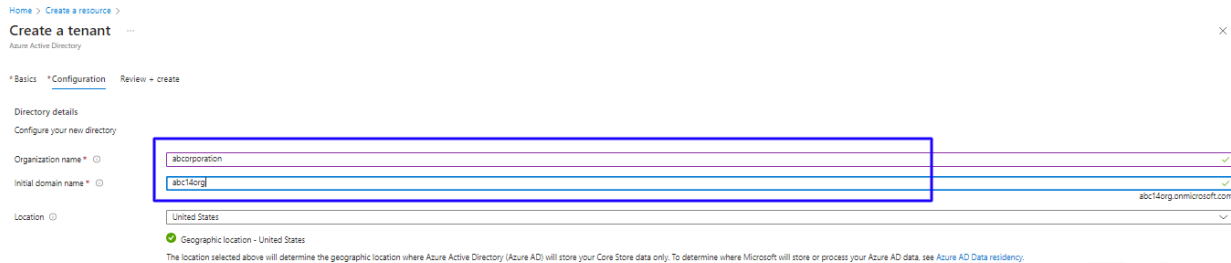

Sign in to Azure Portal. Click on Create a new Resource. Then click on Identity and select Azure Active Directory. Now click on Create here.

You will be redirected to a wizard to Create directory

Enter the details such as the name of the organization, initial domain name, and the country

Home > Create a resource > Create a tenant

Directory details

Configure your new directory

Organization name *

Initial domain name *

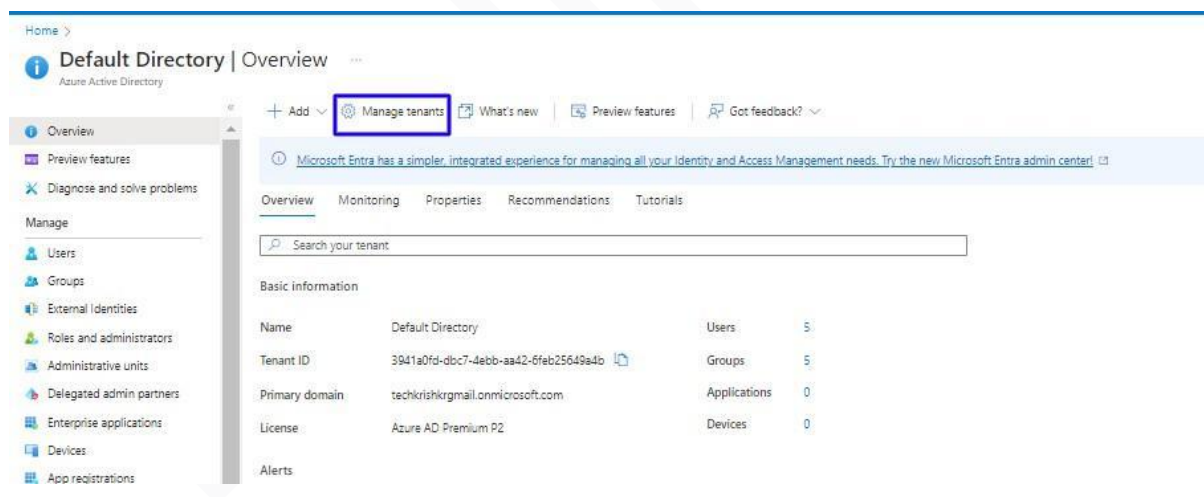

Location

Geographic location - United States

The location selected above will determine the geographic location where Azure Active Directory (Azure AD) will store your Core Store data only. To determine where Microsoft will store or process your Azure AD data, see [Azure AD Data residency](#).

After that click on Review+create. A tenant is created under the Azure Active Directory. To check if the tenant is created or not, Search Azure Active Directory from the search bar :

Click on Manage Tenants
